NEW YORK DRY-GOODS MARKET.

NEW YORK, October 22.—The drygoods market is still without feature of
moment, the only change in the situation being a slight increase reported in
export goods. This is not believed to be
any radical change in export buying, but
simply a demand of the moment, which
has to be covered. Reports coming from
various sections of the country show that
distribution is somewhat freer than for
the last few days, but is by no means
active in print cloths. The demand shows
a tendency toward weakness in all cotton
lines, but no openly avowed declining
condition in prices has been noted. Concessions, however, are quietly made in
many instances, and the offerings from
buyers of weight make it an object of
particular attention in the bidding.
Woollen goods and worsteds in both
men's wear fabrics and dress goods are
strong features.

CHICAGO PRODUCE MARKET.

CHICAGO. October 22.—Sensational advances marked to-day's session in wheat. Desember closed 1 3-8c. higher, and May at a 3 5-8c. advance. The advance, which was attended by the heaviest trading in several weeks, was caused principally by the huge export business on engagements. Sensational reports as to the drought condition east of the Mississippi river caused much figuring on the advance. Corn was also active, and advanced 1-8c., helped by wheat, and a good shipping demand. Oats advanced %c., and provisions closed 2½c. higher for lard to 17½c. higher for pork.

Business Situation According to the

Mercantile Agencies. NEW YORK, October 22.—Brad-street's to-morrow will say: While the

general trade movement is somewhat irregular, and there are further evidences of a falling off in demand, the volume of

of a falling off in demand, the coportions, business continues of large proportions. Speculation in wool has ceased, and the demand for the staple is less than for weeks. Cotton goods are dull on the weak-

ness of raw cotton, and jobbers report dry-goods slower than a week ago. Inte-

rior merchants in the Central West have

not distributed fall stocks as promptly as

not distributed fall stocks as promptly as expected, and many jobbers at western centres find that they overestimated the consumptive demand when securing fall goods. Unseasonably warm weather has interfered with the movement of heavy goods at the West, but rains in Kansas, Oklahoma, and Nebraska have improved the agricultural outlook. Relatively, the greatest activity in trade is reported by Kansas City and Omaha merchants. While quaranthe regulations have been raised in Texas and modified in Louisiana business throughout most of the Gulf states remains practically at a standstill. Almost all the larger eastern cities report, a decreased movement of merchandise,

decreased movement of merchandise, and a tendency of collections to fall away, totably Baltimore, owing to its southern

notably Baltimore, owing to its southern connections.

The industrial situation continues to furnish employment to as many persons as at any preceding period this year, and at higher wages. The production of fron, steel, machinery, stoyes, glass, and woolen goods continues heavy. The steelmils have orders to carry them into 1898, and decline contracts for next year's delivery. This explains the advance in price in Bessemer pig, while the foundry grades are the same. The steady production of fron is starting up furnaces long out of biast, and although consumption is heavy, it is not improbable that production may cutrum it in the near future, which constitutes an unfavorable point in the outlook.

Strutes an unfavorable point in the outlook.

The exports of wheat (flour included as wheat) from both coalins of the United States and from canada this week amount to 5,552,171 bushels, against 6,529,000 bushels last week, 4,647,600 bushels in the same week a year ago, 2,558,000 bushels two years ago, 3,552,000 bushels three years ago, and as compared with 3,227,000 bushels in the like week of 1856. There has been a sharp decline in the export movement of Indian corn—1,177,503 bushels, compared with 2,224,660 bushels last week, 2,973,000 bushels in the same week a year ago, 1,343,000 bushels two years ago, 520,000 bushels three years ago, and as compared with 25,000 bushels in the like week of 1856.

some decrease in the volume of transactions, though at the same time the working force has fast increased, the wages of labor have been in numerous cases advanced, and the foundation has been laid more broadly every week for larger buying and business hereafter.

The iron industry waits, because the possible production for the year has been practically ordered, while neither buyers nor sellers regard contracts at current prices for next year's business as quite safe. Bessemer pig is a shade weaker, at \$10.40, and grey forge at \$5.50, at Pittsburg. The demand for bars is the best for a long time, and contracts for the East-River bridge and for numerous new buildings and railway bridges are still pending. The coke output has risen, and is the largest known for years. Anthractite coal is sold at \$4.15 in New York harbor, or 20 cents below the circular, and conservative estimates make the year's output 4.500,000 tons. The only noteworthy feature in the minor metais is a sensational advance in lead.

The decline in cotton to 6.2 is due to widespread confidence in the large estimates of yield. A natural consequence is the fall in print-cloths to the lowest point in the history of the market 2.37 cents, and cotton goods generally are easy, with limited sales of staples. All woollen goods are firm, but there is no new business of note for spring orders.

The sales of wool have sharply decreased at Boston, amounting to only 3.04,000 pounds the last week in September, and the week was the dullest since January 7th. Some large offerings were made to realize profits before prices fell, but quotations remained unchanged, because at even the 1-2 cent decline buyers were not disposed to take hold.

The produce market acted with as little apparent reason as usual. Although Ariantle exports of wheat were 3.576.607 bushels (flour included), and for three weeks of October, 1,039.908 bushels, against 7.700.000 last year, with western receipts not half a million bushels larger, the price advanced 3 1-2 cents. NEW YORK, October 22 .- To-day's stock market was a contest between professional traders, and the result shows a drawn battle between the bulls and the bears, net changes being extremely narrow in almost all cases, but those on the other side of gains being very few. The bulk of the day's trading was done at a level of prices very materially below that of vesterday. The opening was at sharp declines, in sympathy with London, at which point speculation was very dull, owing to the hardening tendency of the money market and fears of impending stringency there. The old apprehension of Spanish complications was also used with good effect by the bear traders. The declines of the morning reached a point or over in a large number of stocks,

including the leading Industrials, the Grangers, Union Pacific, and the Southwesterns. Union Pacific was affected by position syndicate to bid for the property at the foreclosure sale. The turn in the market came with a sharp recovery in Chicago Gas, on a definite report from Chicago that the control of the threatened opposition had passed to friends of the company. This stock was quite strong during the remainder of the day, selling at one time 21-4 points above last night's close, on the estimated benefits to accrue from countervailing duties on refined sugars from foreign countries which pay a bounty. Union Pacific was relieved from the early pressure by statements from interests alleged to be identified with the opposition

cHicago Live-Stock Market.

CHicago, October 22.—There was a poor demand for cattle, and prices were no better, showing a weak undertone. Native beeves sold at \$1 for the poorest to \$5.30 for the best shipping. Fewer choice cattle were marketed, and numbers of western sold at \$1.75/24. Canners' cattle did not show much change. Calves sold at the same prices as a week ago. Stockers and feeders sold at \$30/44.5. A good many western rangers went for feeders at \$3.00/44.15.

In hogs the market was weak, and-a good many hogs were sold at easier prices, but as the day advanced, values gained strength, until average quotations were a shade higher than at the best time yesterday. The bulk of the hogs brought \$1.50/63.35, common packers selfing at \$2.60/33.56, cand prime assorted light at \$46/34.45. Pigs sold largely at \$3.40/8.35, or hogs sold unusually well.

Sheep and lambs ruled strong. Sheep were salable at \$2.50/25 for the poorest to \$4.50/25 for the best natives, while west ern rangers sold at \$2.50/25 for the poorest to \$4.50/25 for the best natives, while west ern rangers sold at \$2.50/25 for the poorest to selected brought \$5.50.

Receipts: Cattle, 3,000 head; hogs, 23,000 head; sheep, 3,000 head.

CHARLOTTESVILLE, VA., October 22. (Special.)—Judge Grimsley, of the Circuit Court, has affirmed the decision of the County Court in the case of Stephen Points (colored), who had been sentenced to a term of five years in the penitentiary as an accessory to the murder of Thomas W. Thompson at Free Union two years ago. Thirty days was given Points's counsel to consider an appeal.

The case of the County School Board against the alministrators of A. J. Farish, who was Treasurer at the time of his death, has been argued and submitted. The suit involves some thousands of dollars, which the School Board claims to be due to that Body from the late Treasurer's estate.

Out in Dickenson.

DWALE, VA., October 22—(Special.)—
The long continued drought has been broken by a good rain, the first we have had for about six weeks.

There does not seem to be much excitement over the coming election, and it is doubtful if a full vote will be poiled. This county wil give a Democratic majority. The Republicans are not as well organized as usual. Their new county chairman does not take the interest in the matter that the old one did.

I learn that the fever in the "Ridge" section has abated.
